

## Tweak Your Landscape

3796 N. 3386 E. Kimberly, Id. 83341  
208-734-2481

All of us at Windsor's are passionate and excited about creating originality in the garden. We love to share our enthusiasm and relish in the success of you, our customers. We understand that not all people have green thumbs and we are very happy to help guide any color of thumb out there. Tweak your landscape is a service that our very own Joy came up with to help you design small landscape areas within your garden. Full landscape designs are amazing for complete yard transformation or new properties, but not everyone needs that full service for small beds that can cost anywhere from \$1500-\$2000. Tweak your landscape is a free service to help guide you in the right direction. If you buy the plant material from us, we will put you into the first level of our in-house Grow Program called Windsor Roots so you can get discounts on the material and grow into other levels of our loyalty program. The design will be a hand drawn concept off of your pictures that will not be to scale. These are ideas only and Windsors will not be responsible for wrong measurements. We will only design up to 2 small landscape beds at a time. Now with that all said, let's get started with what we will need from you. There is a little work on your end required in order for our designers to complete this style of design.

The following is the information that we will need.

1. Pictures taken from all angles so we can get a good visual of the landscape bed. We would also like a picture taken from the road, side of yard, etc. looking towards the landscape bed so we can see the house or surrounding areas. We like to look at them as if we are standing in your yard.
2. Length and width of the landscape bed. If the bed is all different sizes a quick hand drawn layout with the measurements in feet will be just fine.
3. Sunlight of the landscape bed. Full Sun, Partial Sun with afternoon shade, Partial Sun with morning sun light only, etc. This will help with deciding what type of plant material is able to survive.
4. How is the landscape bed watered? Drip-line, sprinkler spray heads, you and a hose, etc.
5. It is very helpful if you can attach Pinterest or google image pictures showing us the style of landscape or plant material that you like. We want to make sure to design to your taste. This helps us see you.

Email all of this information to [info@windsorsnursery.com](mailto:info@windsorsnursery.com) along with your name, address and phone number. If we have any questions you will receive a call from our designer. Our designer will try very hard to get this completed for you in a timely manner, but they do run our landscape crews and are not always in the office working on designs. Once the design is completed a Windsor team member will call you and have you come in to go over the layout with you and show you the plant material.

Thank you for choosing us to grow with,  
**The Windsor Team**
